

MyZonePilot

Melbourne Driver Intelligence Platform

What is MyZonePilot?

MyZonePilot is a platform being built to help delivery drivers make smarter decisions about where and when to work. Drivers contribute real-world insights about busy zones, wait times and earnings to help the community avoid dead areas and improve shift planning.

What Drivers Will Be Able To Do

- See busy delivery zones across the city
- Track real shift earnings and performance
- Share driver insights with the community
- Avoid low earning areas and long waits

Early Access

MyZonePilot is currently launching in Melbourne. Drivers who join the early access list will be invited to test the platform first and help shape its development.

Driver Safety

MyZonePilot is designed to be used safely while parked. Drivers should never interact with the platform while driving and must always follow local road laws.
